

Kondra Ramesh

React JS Developer | 1.2 YOE

Phone: +91 6301862462 Email: kondraramesh9999@gmail.com LinkedIn: linkedin.com/in/ramesh Location: Hyderabad, India

CAREER OBJECTIVE

Experienced Front-End Developer with a proven track record of developing scalable web applications and crafting responsive user interfaces. Spearheaded a food delivery application from scratch, integrating payment solutions like Stripe and PayPal, and enhancing user experience with real-time order tracking. Proficient in React.js, Redux, and Keycloak, delivering secure, seamless, and impactful solutions tailored to diverse user roles.

EDUCATION

Bachelor of Science in Computer Science	July 2017 – August 2020
Chanakya Degree College	CGPA: 6.5
Board of Intermediate Education	June 2015 – May 2017
Sri Vijaya Sai Junior College	Percentage: 91%

TECHNICAL SKILLS

- **Programming Language:** JavaScript
- **Front-End Technologies:** HTML, CSS, JavaScript, React.js
- **Frameworks:** Bootstrap, Material UI
- **Version control:** Git/GitHub
- **Operating Systems:** Windows

EXPERIENCE

- VVGlobalSolutions (Feb 2024 - May 2025)

PROJECTS

Food Delivery Web Application	Feb 2024 – May 2025
• Developed a food delivery web application from scratch using React.js and Redux with a fully responsive UI. • Built reusable UI components and integrated REST APIs using Axios.. • Developed reels functionality for images and videos using the Intersection Observer API for smooth scrolling and performance.. • Implemented restaurant-based cart logic, allowing users to add items from only one restaurant at a time. • Integrated Google Maps to fetch user location automatically with permission handling. • Implemented multi-language support (i18n) for language switching.	

Backend Contributions

- Developed **CRUD REST APIs** using **Node.js** and **Express.js** for the **Admin Panel**.
- Created an **automatic restaurant open/close API** based on time scheduling.
- Worked closely with backend developers to **modify and optimize APIs** based on frontend requirements and user experience improvements, as suggested by the team lead and backend team.
- Participated in API testing and validation using **Postman**.
